CISM®
Certified Information Security Manager

CISM is one of the most important infosec qualifications in the world today. CISM defines the core competencies and international standards of performance that information security managers are expected to master. It provides executive management with the assurance that CISM holders have the experience and knowledge to offer effective security management and advice. This course provides an intense environment in which participants can acquire the skills and knowledge expected of a world-class information security manager.

Audience

The CISM prep training course (ISACA®) is aimed to CISM Exam candidates who have at least 5 years of Information Security experience.
